

Textiles from Egypt in the Royal Museums of Art and History in Brussels: History and Provenance

Alexandra VAN PUYVELDE

ANNEX 1 : OVERVIEW AND CONCORDANCE TABLE Egyptian textiles in the RMAH collection

This overview and concordance table includes the Egyptian fabrics kept in the Art of Eastern Christianity and the Art of the Islamic World collections, as well as fabrics belonging to the Egyptian Collection of the RMAH. The table lists the textiles according to their current inventory numbers, gives an overview of the provenances and shows, if known, the concordances between the current and old inventory numbers. It also mentions the numbers from Errera's catalogues. Pharaonic textiles kept in the Egyptian collection are only included if they are mentioned in Errera 1916. Some pharaonic textiles preceded by the letters "Tx" do not have the prefix "E". We do not yet know whether they indeed correspond with inventory numbers with the prefix "E" from the Egyptian collection. For quite a number of textile fragments, the old inventory numbers remain to be identified.
